Do we have your feedback already?

We are delighted to get your feedback on our BACnet gateways.

Do you know already ...?

... our data concentrator MUC.easy^{plus}?

It addresses all common standards thanks to the large variety of interfaces. The data can be stored in the 4 GB storage are transmitted independently to up to 10 different systems.

... our Modbus gateways?

These are ideally suited for the reading of instantaneous values in automation technology. Up to 500 unit loads can be operated directly. The values are provided as Modbus registers.
